Lanes to close as ramps built for Chicago Spire

Tribune staff report

October 1, 2007

NEAR NORTH SIDE

Temporary lane closings are scheduled to start Monday on the northbound lower level of Lake Shore Drive from north of Lower Wacker Drive to Illinois Street to accommodate the construction of two ramps that will serve the Chicago Spire development, according to the Chicago Department of Transportation.

During the next month, motorists can expect more lane reductions on Illinois Street, east of Lake Shore Drive, extending into Navy Pier, the agency said. Pedestrian access will be maintained.

The ramps will be built on the east and west sides of Lake Shore Drive to provide access to the Chicago Spire development.

The lane closings will be in place through late January, the agency said.
